PRODUCTBESCHRIJVING

Sony Alpha 7RV | Full-frame Mirrorless Interchangeable-lens Camera (61MP, Real-time autofocus, 10 fps, 8K, 4K60p) The "α7R V" is a new camera with a great innovation in subject recognition performance with "AI processing unit" that is dedicated to artificial intelligence processing, including deep learning. State-of-the-art AI processing uses detailed information about human skeleton forms and poses to dramatically improve the camera's subject recognition accuracy and make full use of its potential resolution AI subject recognition has been expanded to include a number of new subject types, including vehicles and insects. The "α7R V" is the fifth model in the α7R series, delivering even higher still image quality than its predecessors plus refined 8K movie output, unlocking unprecedented subject detail and texture. It also includes the most effective 8-step image stabilization ever offered in an α body, a new multi-angle monitor, high-speed communication functions. High-level operability and smooth workflow integration round out a camera that is ideal for professionals who need a first-class high-resolution imaging tool. AI POWERED AUTOFOCUS: Achieve accurate, fast, and consistent Real-time autofocus tracking of subjects with unique AI driven technology. You'll even experience an advanced recognition of additional subjects' eyes (human, animal, bird, insects, car, airplanes) with seamless implementation for a unique shooting experience. With this professional camera, shoot sharp pictures and video content, even in difficult conditions. OUTSTANDING DETAILS: The stunning 61MP back-illuminated full-frame sensor paired with the BIONZ XR™ image processing engine delivers outstanding detail and colour accuracy - even in difficult lighting. Shoot at up to 10...
